

## “re-usable modular exhibition design solution for Axxia Systems”

Axxia has been a client for 16 years and during that time we have designed and built many high-impact stands. The one shown was at the Legal IT Exhibition, which ran at the Business Design Centre, and is based on a modular structure to enable re-use at other locations.

### **AXXIA SYSTEMS** **LEGAL IT EXHIBITION**

With a high level of manpower we were able to install the stand complete with hard wired computer installations, graphics, furniture and floral in a nine-hour window. Although this does not seem particularly remarkable, it does underline the flexibility of our approach, and our proven ability adapt to differing customer demands.

#### project facts

Built inside the Business Design Centre

Construction and installation completed in the nine hours we were allowed

Hard wired computer installations, graphics, furniture and floral

Modular design allows re-use at other locations
